for Youngevity®

Isola Luce was founded by the husband and wife team of Garrett and Connie Wesson in 1999. During a trip to Indonesia, the couple first discovered candles made from palm oil and immediately became interested in developing their own line of palm oil-based candles. Palm oil candles were definitely a greener and more environmentally friendly alternative to the paraffin candles which dominated the market! Palm oil candles emit fewer carcinogens into the air and produce a whiter, brighter flame.

After a few years of research and development, Isola Luce was born as a high-end candle line made with the finest quality fragrances consisting of a blend of natural oils and other natural ingredients. Isola Luce is inspired by the exotic and wonderful fragrances found in many of the most beautiful places on earth.

Burning a candle should be an experience for mind, body and spirit and with an Isola Luce candle, you can achieve blissful living without sacrificing the environment.
